Proteccion del Server Web Con Fortigate

Hello World!

Esta Pagina WEB fue creada con el fin de Demostrar el Laboratorio de Seguridad de Redes
By: Mario Jose Pujols De La Cruz
Matricula: 2022-1453

Configuration Overview

Ubuntu's Apache2 default configuration is different from the upstream default configuration, and split into several files optimized for interaction with Ubuntu tools. The configuration system is **fully documented in /usr/share/doc/apache2/README.Debian.gz**. Refer to this for the full documentation. Documentation for the web server itself can be found by accessing the **manual** if the apache2-doc package was installed on this server.

The configuration layout for an Apache2 web server installation on Ubuntu systems is as follows:

```
/etc/apache2/  
|-- apache2.conf  
|   |-- ports.conf  
|   |-- mods-enabled  
|       |-- *.load  
|       |-- *.conf  
|-- conf-enabled  
|   |-- *.conf  
|-- sites-enabled  
|   |-- *.conf
```

The screenshot displays the Fortinet Security Fabric Log & Report interface. The left sidebar shows the navigation menu with options like Dashboard, Network, Policy & Objects, Security Profiles, VPN, User & Authentication, System, Security Fabric, and Log & Report. The main area shows a table of traffic logs for a selected policy (Policy UID: 5a1f7262-b7d0-51f1-e31b-651918935cb1). The table columns include Date/Time, Source, Device, Destination, Application Name, Result, and Policy ID. The logs show various traffic types such as Local Traffic, Sniffer Traffic, Events, AntiVirus, Web Filter, SSL, DNS Query, File Filter, Application Control, Intrusion Prevention, Anomaly, Log Settings, and Threat Weight. The right sidebar provides details for the selected log entry, including General information (Absolute Date/Time, Time, Duration, Session ID, Virtual Domain), Source information (Source Port, Country/Region, Primary MAC, Source Interface, Device Type, OS Name, User), Destination information (IP, Port, Country/Region, Destination Interface), Application Control details (Application Name, Risk, Protocol, Service), and Data statistics (Received Bytes, Received Packets, Sent Bytes, Sent Packets). The bottom status bar shows the Fortinet logo, version 7.0.3, and the current time 09:29.

The screenshot shows the "Security Profiles" section in the Palo Alto Networks management console. The left sidebar lists various security features like Dashboard, Network, Policy & Objects, Security Profiles, AntiVirus, Web Filter, and Video Filter. Under "Security Profiles", the "AntiVirus" category is expanded, displaying a table of configured profiles.

Name	Read Only	Comments	Ref.
certificate-inspection		Read-only SSL handshake inspection profile.	0
custom-deep-inspection		Customizable deep inspection profile.	1
deep-inspection		Read-only deep inspection profile.	0
no-inspection		Read-only profile that does no inspection.	2
